

## VT220WI+C

### 22GHz Waveguide Cross Coupler

#### Description

Cross couplers are typically used for power sampling, frequency monitoring and standing wave testing. This is a four-ports configuration cross coupler. The directivity is over 18 dB. The coupling level can be custom made ranging from 20 dB to 60 dB. The flange type, connector type and sizes can be custom made as per customer's specific requirements.

#### Specifications
